Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), React Hooks, HTML5, CSS3, SASS, Tailwind CSS, Reusable Component Libraries, Responsive and Cross-browser Design, Accessibility

State Management: Redux, Redux Toolkit, Zustand

Testing & Quality: Jest, React Testing Library, Unit Testing, Integration Testing, TDD, Debugging, Code Reviews, SonarQube, Fortify

Performance: Core Web Vitals (LCP), Code Splitting, Lazy Loading, Memoization

Security: Frontend Security (XSS and CSRF Prevention, Content Security Policy, Secure Authentication and Token Handling, Dependency Vulnerability Scanning)

APIs & Backend: GraphQL, Apollo Client, REST APIs, API Integration, Node.js/Express, MySQL

Tools & DevOps: Git, GitHub, Bitbucket, GitHub Actions, CI/CD (Jenkins), npm, Jira, GitHub Copilot, MCP (Model Context Protocol)

Experience

Capgemini **Chennai, India**

Software Engineer (Front-end) *Jun 2025 – Present*

- Led front-end development of a scalable **health monitoring platform** using **React.js**, **Redux**, and **Material UI**, delivering real-time dashboards and automated alerts that reduced issue diagnosis time by **30%**.
- Built a **Micro Frontend** architecture with reusable components published as **npm packages**, and integrated **GraphQL** APIs with **Apollo Client** for faster data fetching and caching, improving scalability and responsiveness.
- Owned front-end **performance** on monitoring dashboards, improving load times and **Core Web Vitals** through **code splitting**, **lazy loading**, and **memoization**.
- Reviewed pull requests to enforce **coding standards**, maintainability, and test coverage across the team, and ensured reliability with **unit and integration tests** in **Jest** and **React Testing Library**.
- Applied **front-end security** best practices, including **XSS prevention** through input sanitization and output encoding, **Content Security Policy**, and secure token handling, reducing vulnerability risk, protecting user data, and helping the organization meet security and compliance standards.
- Used **GitHub Copilot** with **Model Context Protocol (MCP)** tools to connect Jira and Bitbucket, automating ticket-to-code workflows and speeding up day-to-day development.
- Automated build and deployment with **Jenkins**, using **Fortify** and **SonarQube** to maintain code quality and security standards.

Vue Data Technologies **Chennai, India**

Software Engineer (Front-end) *Nov 2023 – Jun 2025*

- Developed a responsive UI with **React.js** and **Tailwind CSS**, enabling journalists to create, edit, and publish journals seamlessly.
- Built a feature-rich dashboard to manage journal creation, publishing workflows, and content structuring.
- Integrated **AI-powered REST** APIs (NewsData.io, OpenAI, scanned book datasets) to auto-generate paragraph summaries, reference links, citations, book references, and author suggestions.
- Implemented **Redux** for state management, improving application stability and reducing bugs.
- Migrated legacy JavaScript code to **TypeScript** and added **Jest** tests, improving reliability and maintainability.

Cognizant Technology Solutions **Chennai, India**

Software Engineer (Front-end) *Oct 2022 – Nov 2023*

- Collaborated with designers to build responsive UI components from **Figma** designs for a seamless multi-device experience.
- Created reusable **React** templates, reducing development time by **30%**.
- Integrated **REST APIs** for efficient front-end and backend communication.
- Achieved **95% test coverage** with **Jest**, improving code reliability through **TDD**.

Junior Software Engineer (Front-end) *Oct 2020 – Oct 2022*

- Migrated an entire website from mockups to responsive **React.js** apps in collaboration with UX designers.
- Built an accessible **UI component library** with HTML, CSS, and SASS, boosting development efficiency by **30%**.
- Developed custom **React hooks** for login authentication, improving code reusability.
- Created database tables and stored procedures to streamline customer data management.
- Optimized **MySQL** queries with proper indexing, improving query performance and data retrieval speed.

Projects

Code Dock – Online IDE 1codedock1.netlify.app

Tech: React, JavaScript, REST APIs

- Engineered an **online IDE** supporting C++, JavaScript, Python, and Java.
- Enabled code writing, compiling, execution, and test case validation, cutting debugging time by **40%**.
- Implemented import/export features, streamlining developer workflow.

Education

St Joseph's College of Engineering Chennai, India

B.Tech in Information Technology 2016 - 2020

Certifications

Microsoft Certified: **Azure Fundamentals (AZ-900)**
